

Home Tune Up Checklist

- **Check the functionality of all GFCI receptacles.**
- **Check the functionality of all AFCI receptacles (if any present).**
- **Check the functionality of all smoke detectors.**
- **Check the functionality of all circuit breakers.**
- **Put new batteries in all smoke detectors. If you have batteries, we will gladly use yours. We will have batteries on hand that we can install and bill you for them.**
- **Use the thermographic meter to detect hot spots at the MCB Panel and any sub panels.**
- **List any code violations that we see. For a complete home inspection please see the 84 point home electrical inspection checklist.**
- **Check the torque on all connections in the MCB Panel and any sub panels.**
